DETAILED ACTION

This application is 371 of PCT/US99/08975. The preliminary report amending claims 1, 10, 18, 22 and 23, has been entered.

Claims 1-23 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10 and 18-21, drawn to DNA molecule encoding a secoisolariciresinol dehydrogenase protein and DNA hybridizing to said DNA, a vector comprising said DNA and a host cell comprising said DNA.

Group II, claim(s) 11-17, drawn to a secoisolariciresinol dehydrogenase.

Group III, claim(s) 22-23, drawn to a method of enhancing the expression of a secoisolariciresinol dehydrogenase protein in a host cell.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking I-III appears to be that they all relate to a secoisolariciresinol dehydrogenase.

Groups I-III do not share a technical feature because the DNA molecule of Group I (claim 1) can encode a polypeptide not having the structure of the protein of Group II.

Art Unit: 1652

For a DNA and protein group to share a special technical feature, claims drawn to the DNA must be DNA sequences that encode the structure of the protein in the claims drawn to the protein (see PCT administrative instructions Example 17). Therefore, the technical feature linking Group I and Groups II-III is lacking.

In addition to election one group, applicants are required to further elect ONE polypeptide sequence or ONE DNA sequence. The disclosure contains many DNA encoding proteins from different sources having different structure and different function and many proteins from different sources having different structure and different function.

Under 37 CFR 1.475 (d), a national stage may not relate to multiple products or multiple processes in one application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
